DT-V20L3D

20" HD Multi-Format Studio Monitor

The DT-V20L3DU is a 3rd generation studio quality monitor designed for a wide range of applications in television studios, remote production vans, production and post facilities. Its compact size and high resolution make it ideal for rack mounting, or for use in cramped editing suites. JVC's anti-diffusion screen surface produces sharper images with high contrast and rich colors. A third generation digital processor significantly improves image quality while reducing latency to less than one frame. A new pixel based motion adaptive deinterlacer delivers 1080i images that look like progressive.

Achieving HD images, faithful to original signals, with less than one frame of latency

Features

- 1680x1050 pixels
- Circuits that deliver low latency of less than one frame
- Waveform monitoring with over level function
- Gold-plated HD/SD SDI terminals with embedded audio
- DVI-D with HDCP terminal
