

Model: DT-X71HP

7" Camera-top LCD Monitor

User Manual

Ver: C

Please read this User Manual throughout before using.

Preface

- All internal technologies of this product are protected, including device, software and trademark. Reproduction in whole or in part without written permission is prohibited.
- 2. All brands and trademarks are protected and other relative trademarks in this user manual are the property of their respective owners.
- 3. Due to constant effort of product development, SWIT Electronics reserves the right to make changes and improvements to the product described in this manual without prior notice.
- 4. The warranty period of this product is 2 years, and does not cover the following:
 - (1) Physical damage to the surface of the products, including scratches, cracks or other damage to the LCD screen or other externally exposed parts;
 - (2) The LCD dot defects are not over three;
 - (3) Any damage caused by using third-party power adaptors;
 - (4) Any damage or breakdown caused by use, maintenance or storage not according to the user manual.
 - (5) The product is disassembled by anyone other than an authorized service center.
 - (6) Any damage or breakdown not caused by the product design, workmanship, or manufacturing quality, etc.

Warning

1. In order to reduce the risk of fire and electrical shock, do not lay this product in rain or damp places.

2. Please keep away from the strong magnetic field; it may cause the noise of the video and audio signals.

The power

1. Please use the power adapter provided or recommended by the manufacturer in order to avoid damage.

2. For a third party power adapter, please make sure the voltage range, supplied power, and polarity of power lead are fit.

3. Please disconnect the power cable under the following situations:

- (A). If you do not operate this monitor for a period of time;
- (B). If the power cable or power adaptor is damaged;
- (C). If the monitor housing is broken.

The monitor

- 1. Please don't touch the screen with your fingers, which would probably deface the screen.
- 2. Please don't press the screen; the LCD is extremely exquisite and flimsy.
- 3. Please don't lay this product on unstable place.

Cleaning

1. Please clean the screen with dry and downy cloth or special LCD cleanser.

2. Please do not press hard when cleaning the screen.

3. Please do not use water or other chemical cleanser to clean the screen. The chemical may damage the LCD.

Packing list

- 1. Sun hood
- 2. Ball head
- 3. SSL-JVC50 battery plate (Pre-install)
- 4. LCD protection film
- 5. Power adaptor
- 6. HDMI cable (0.5m)
- 7. BNC video cable (0.5m)

·Front Panel

- (1) PHONE: 3.5mm headphone socket, for SDI/HDMI embedded audio and analog audio monitoring.
- (2) POWER: Power on/off
- (3) Buttons

SDI: Press to switch the input signal to SDI

HDMI: Press to switch the input signal to HDMI

CVBS: Press to switch the input signal to Composite video

 $F1 \sim F5$: User definable function keys. Please see details in "4. Function key" under "Main Menu". AudioBar: Press "AudioBar" to switch on/off audio bar.

DISPLAY: Press "DISPLAY" to turn on or turn off relevant status information, audio and video analysis assistant Pattern. When main menu is activated, press "DISPLAY" to quit menu.

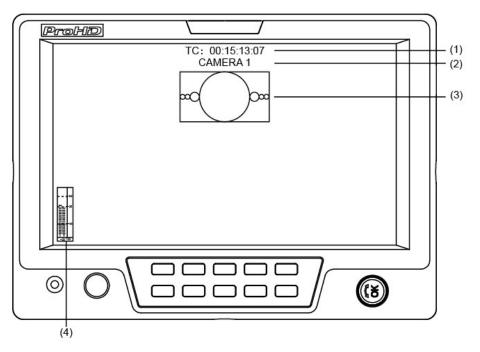

- (4) Multi-function rotary knob
- Main menu setting

Press the knob to enter Menu system. Please see details in "Main Menu".

• Adjust volume, image display parameters

When the menu is inactivated, rotate this knob to adjust volume or image display parameters such as brightness, contrast and saturation .etc. The parameters will be larger if clockwise adjusted. When the menu is activated, press the rotary knob to save the previous settings, and pop up to the next setting, which follows the sequence of "Volume→Brightness→Contrast→Saturation"

- Note: This knob which is used to adjust volume and image parameters has memory function. If Brightness is adjusted, and the menu is inactivated, rotate this knob will adjust the parameters of the brightness.
- (5) TALLY Light: Red, Green and Yellow 3-color TALLY indicator

(1). Time code (SDI)

Under SDI input, it can display Time code. If no Time code information is detected, it will be displayed as "TC: UNLOCKED".

(2). UMD

Set up the UMD under "UMD" submenu.

(3). AFD (SDI)

User can set function keys F1 \sim F5 or GPI pins as "AFD" to turn on or off this function. If no relevant information is detected, it will be displayed as "AFD: UNLOCKED".

(4). Audio

Monitor the audio information. User can set function keys F1 \sim F5 or GPI pins as "Audio" to turn on or off this function.

The relevant parameters like position, audio channels and blending, etc can be changed under "Audio" submenu.

Introduction of audio and video functions

• 2-ch embedded audio meters

Under SDI/ HDMI/ CVBS, it displays 2 channels embedded audio meters. The audio meter is green, and will turn yellow when audio exceeds -20dB, and turn red when audio exceeds -9dB.

Audio alarm

If the embedded audio value is too low or no embedded audio, it will display "MUTE" or "UNLOCKED" in the audio bar.

Time code (SDI)

Under SDI input, it can display the SMPTE time code (VITC1, VITC2 or LTC) on the top of the screen, which is used extensively for synchronization, and for logging and identifying material in recorded media. If no Time code information is detected, it will be displayed as "UNLOCKED".

Internal Color Bar

Under SDI and HDMI input, it has 100% internal color bar which helps to analyze the monitor color and adjust the display parameter.

User can set function Keys F1 \sim F5 or GPI pins as "color bar" to turn on or off this function.

Peaking focus assist (red/blue switch)

The Peaking focus assist function is to mark the sharpest edges of the image with red or blue color under SDI and HDMI input, for users to check if the subjects are focused.

User can set function Keys F1~F5 or GPI pins as "Focus Assist" to turn on or off this function.

Zebra stripes

Zebra Stripes are used to check if the image is over exposed or not by showing black and white lines on the monitor. It is considered over exposed when luminance value exceeds 90%.

User can set function Keys F1 \sim F5 or GPI pins as "Zebra" to turn on or off this function.

• Freeze Frame

The freeze frame is to capture and display the current broadcast frame.

User can set function Keys F1~F5 or GPI pins as "Freeze Frame" to turn on or off this function.

R/G/B/Mono

R/G/B/Mono is to display only the blue/red/green primary signal or the luminance signal only so as to monitor the image noise.

User can set function Keys F1 \sim F5 or GPI pins as "R/G/B/Mono" to turn on or off this function.

False Color

The false color is used to aid in the setting of camera exposure. Under false color mode, there's a color chart on the bottom of screen for reference. The color from the dark to the bright will be displayed as blue, cyan, green, yellow, orange and red in a consecutive way. User can set function Keys $F1 \sim F5$ or GPI pins as "False color" to turn on or off this function.

AFD (SDI)

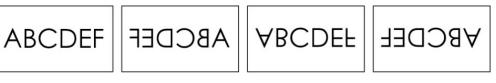

It is the abbreviation of active format description. AFD is to display the SDI embedded AFD information graphically on the screen.

H/V Delay (SDI)

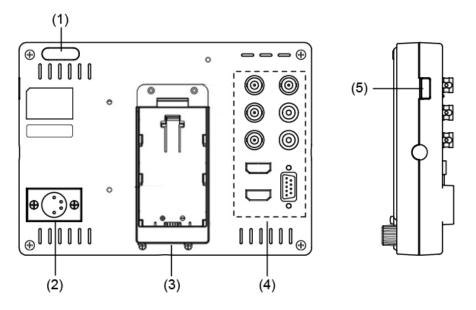

Under SDI input, H/V Delay can be used to display line/field blanking signal, and to observe the horizontal and vertical synchronous signal.

Image Flip

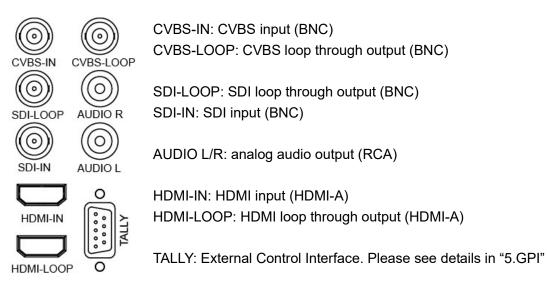

Horizontal, vertical, horizontal and vertical two-way image flip function.

·Back Panel

- (1) TALLY Light: Red, Green and Yellow 3-color TALLY indicator
- (2) DC 12V IN: Connect with the provided DC12V 4-pin XLR power adapter, and support 6.5-17V wide voltage Input (Pin 1: Negative, Pin 4: Positive)
- (3) SSL-JVC DV battery plate: Compatible with SSL-JVC50/75 batteries
- (4) Video Signal Interface

(5) USB: For firmware upgrade

Main Menu

DT-X71HP has OSD to adjust the parameters and settings, for example: Picture, color temp., function keys, etc.

1. Press "OK" button, the main menu will pop-up from the left top of the screen. The selected main menu highlights in yellow.

Main Menu		Status	
Exit&Status Picture Color Temp Function Key GPI UMD Marker Audio Vector Waveform Display System OSD Key Inhibit	~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~	HDMI User Profile Color Temp Scan Mode Freeze Frame Odd/Even Frame F1 F2 F3 F4 F5 System Version	XXX XXX XXX XXX XXX XXX XXX XXX XXX XX

2. Revolve "OK" to select submenu, the selected submenu highlights in yellow, press "OK" to apply and enter into the selected submenu's items.

3. Revolve "OK" to select the item which needed to adjust; press "OK", the selected item and its parameters will be highlighted in yellow.

Main Menu		Marker
Exit&Status Picture Color Temp Function Key GPI UMD Marker Audio Vector	~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~	Exit Marker XX Marker Select 15:9 Safety Area XXX Fit Marker XXX Center Marker XXX Marker Color XXX Marker Outside XXX
Waveform Display System OSD Key Inhibit	~ ~ ~ ~ ~	

4. Revolve "OK" to change the selected item's parameter, press "OK" to apply and save the settings.

5. Revolve "OK" to select "Exit", press "OK" to quit submenu. Select "Exit & Status" under the Main Menu and press to quit Main Menu.

Notice:

* The items in gray cannot be set up.

* If there is no operation under the set time, the menu will automatically save settings and quit.

* If the key inhabit function is turned on, except key inhibit function, all other items are in grey. Please turn off the key inhibit function to adjust the items.

1. Exit & Status

Displays the current status, the details are as down below:

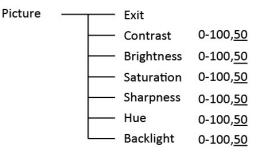

Exit&Status		1080p@50Hz
	User Profile	Factory
	Color Temp	6500K
	Scan Mode	Normal
	Freeze Frame	Off
	Odd/Even Frame	Off
	F1 ^{*2}	Aspect Ratio
	F2	Focus Assist
	F3	Zebra
	F4	Mute
	F5	Marker
	System Version	VXXX-XX

*1 Display the current video signal and format

*2 Display the current function keys setup

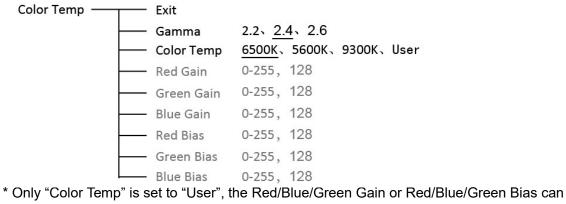

2. Picture

To adjust picture parameters

3. Color Temp

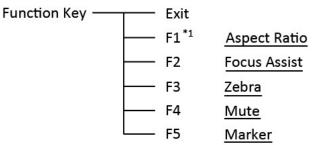

To select different color temperature or setup user-defined color parameters.

be adjusted.

4. Function key

To define the F1 \sim F5 function keys.

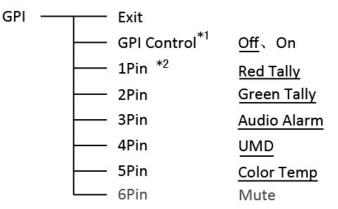

*1 Function keys F1 \sim F5 can be set as the down below functions:

Aspect Ratio, Scan Mode, Zoom Mode, Mute, Freeze Frame, Flip Mode, Color temp., Time code, Zebra, Audio Bar, False Color, AFD, H/V Delay, R/G/B/Mono, Marker, Color Bar, UMD, Audio Alarm, Max Backlight, Focus Assist

5. GPI

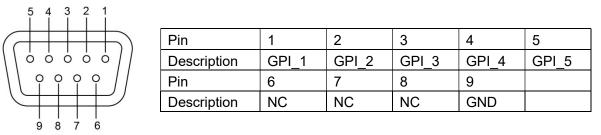

User can set GPI pins to relevant functions to turn on or off this function.

*1 When "GPI control" is set to "On", the monitor can be operated through external GPI control unit.

*2 The GPI pins can be set to the down below functions:

Red Tally, Green Tally, Yellow Tally, Aspect Ratio, Scan Mode, Zoom Mode, Mute, Freeze Frame, Flip Mode, Color Temp, Time Code,

When connecting the GPI pin with ground, the setted function will be turned on, and goes out when disconnecting.

Example 1: Under "GPI " submenu, set "GPI control" to "On", set "2 Pin" to "Red Tally", when the pin 2 of the extenal GPI control unit is connected with ground, the Tally light on the front panel will turn red. When disconnected, the tally light will turn off.

Example 2: Under "GPI" submenu, set "GPI control" to "On", set "5 Pin" to "Zoom Mode", when the pin 5 of the extenal GPI control unit is connected with ground, the Zoom mode will change and follow the sequence: "off" \rightarrow "Zoom 1" \rightarrow "Zoom 2".

6. UMD

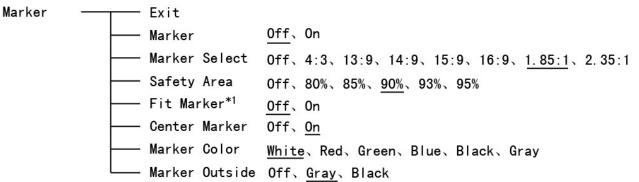

UMD

Support Source ID edit and display on screen

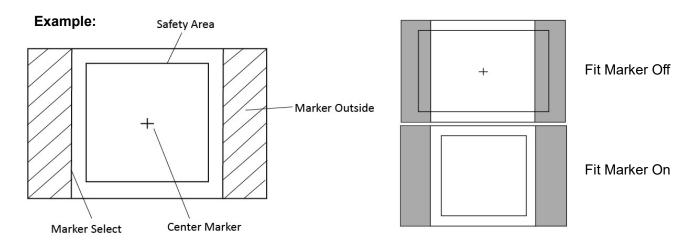

— Exit	
RS485 Address	1
Position	<u>Top</u> 、Bottom
—— Display Type	Source ID、UMD
Baud Rate	38400、9600、19200
Parity	Even, None
Serial Port	RS485
Source ID	CAMERA 1

Select "Source ID", revolve "OK" to select the letters and press "OK" to input. Select "Exit" to quit and save settings, the source ID will be displayed on top or bottom of the screen.

7. Marker

*1 When "Fit Marker" is "Off", the size of safety area is benchmarked against the actual display screen, accounting for $80\% \sim 95\%$ of actual display screen. When "Fit Marker" is "On", the size of safety area is benchmarked against the area inside the scales marker, accounting for $80\% \sim 95\%$ of the area inside the scales marker.

8. Audio

Audio —	Exit	
	Audio Bar	<u>Off</u> On
	Bar Frame ^{*1}	Off、 <u>On</u>
	Bar Position	Top Right, Bottom Left, Bottom Right, Top Left
	Bar Blending	Low、Off、High
	Audio Alarm ^{*2}	<u>Off</u> 、 On
	Select Channel	Channel 1-2
	Left Channel ^{*3}	CH1-CH2, <u>CH1</u>
	Right Channel	CH1-CH2, <u>CH2</u>

*1 When "Bar Frame" is set to "Off", only the audio meter will be displayed. When "Bar Frame" is set to "On", frame and real-time audio value will be displayed.

*2 When "Audio Alarm" is set to "On", if no embedded audio is detected, the audio bar will display "UNLOCKED". If the audio value is too low, the audio bar will display "MUTE".

*3 Only under SDI I signal, channel1-2 can be selected.

9. Display

Display		Exit	
		Waveform	Off
	-	Audio Bar	<u>Off</u> 、 0n
		Vector	Off
		Zebra	<u>Off</u> , On
		Focus Assist	Off、Blue、Red
		Time Code	<u>Off</u> 、 0n
		Histogram	Off
		False Color	<u>Off</u> , On
		AFD	<u>Off</u> 、On
		H/V Delay	<u>Off</u> 、On
		R/G/B/Mono	Off、Blue Only、Red Only、Green Only、Mono
		Color Bar	<u>Off</u> 、On
		Marker	0ff、0n
		UMD	<u>Off</u> 、 On

To quick switch on/off the functions and information to display.

10. System

System		Exit	
		Aspect Ratio	<u>16:9</u> 、4:3、Auto
		Scan Mode	Normal OverScan Native
		Zoom Mode	Off、Zoom1、Zoom2
		Odd/Even Frame	Off
		Color Space	Auto
		Freeze Frame	<u>Off</u> 、On
		Flip Mode	Off、H Flip、V Flip、 H/V Flip
	<u> </u>	Recall Profile	Factory、User1、User2、User3
	—	Save Profile	User1、User2、User3
		Source Scan *1	<u>On</u> 、Off
		Logo ^{*2}	<u>On</u> 、Off
		Green Mode	Black Backlight
		Idle Duration	2Hours
		Update Driver *3	<u>No</u> v Yes
		Update Kernel ^{*4}	<u>No</u> v Yes

*1 Source Scan

When set to "ON", after turn on the monitor, the signal will be inspected and follow the sequence of "SDI→HDMI→CVBS".

*2 Logo

When powered on, the screen will display ProHD logo.

*3、*4 Update Driver/ Kernel

Download latest firmware files in USB disk - root directory. Switch on the monitor, and insert USB disk into the USB socket on side panel.

Enter Menu – System – Update Kernel, select YES and the monitor will upgrade automatically, and will restart when upgrade finished.

Enter Menu – System – Update Driver, select YES and the monitor will upgrade automatically, and will restart when upgrade finished.

Please DO NOT cut off power during firmware upgrade.

USB firmware upgrade

Firmware Upgrating... 37%

Caution ! DO NOT cut off power during firmware upgrade.

11. OSD

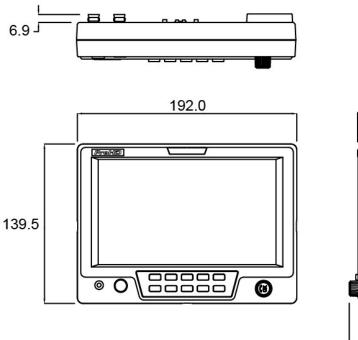

OSD Exit	
OSD Language	English Chinese
OSD Blending	Low、Medium、High、Off
OSD Duration	<u>10Sec</u> 、15Sec、30Sec、60Sec
OSD Zoom	Off∖ <u>On</u>
Key Led Brightness	Low
—— Tally-R Brightness	High、Low、 Medium
Tally-G Brightness	High、Low、 Medium
12. Key Inhibit	
Key Inhibit — Exit	
Key Inhibit	<u>Off</u> 、 On
If the "Key Inhibit" is "On", there is no res	sponse when all the buttons except "OK" are pressed.

Trouble-shooting

Symptom	Possible Causes	Solution
	The power is not turned on	Please check if the power is connected, and then press "POWER" button to turn on the monitor
	Unstable power voltage	Reconnect to power supply
No display	BNC or HDMI cable loose contact or not correctly connected	Check and correctly connect the BNC or HDMI cable
	The attached battery is no power	Change battery
	Using DIY power supply but the polarity is reversed	Refer to the provided power supply, reconnect the power.
	Bad contact of BNC or HDMI cable	Change cable
	Video signal has Interference	Remove the interference source(s)
	Improper adjustment of the color parameters	Adjust the "Recall profile" to "Default" under "System" submenu
Image or color abnormal	Distortion of the image	Reset the Aspect ratio
abnormai	Set to Red/Green/Blue only or Mono	Turn the Blue only/ Red Only/ Green Only/Mono off under R/G/B/Mono submenu
	Turn on the "Focus Assist" function	Turn off the "Focus Assist" function
	Turn on the "False Color" function	Turn off the "False Color" function
No audio output	Set to Mute	Turn off MUTE or revolve "OK" to adjust the volume
	Bad contact of signal cable	Change signal cable
	Wrong connection or bad contact of Audio cable	Connect to the correct input socket.
