- Notes

NVR Ver1.5 or later version can be updated to ver4.0 using this update program. Please update the NVR to ver1.5 before updating to ver4.0 if your NVR is earlier than ver1.5.

It is recommended to return the unit to factory setting before updating to ver4.0 if you have installed any other software into your NVR for testing.

This Ver4.0 program includes VN-V25U/26U/686U latest drivers. Please use separate device driver program to connect VN-V25U/26U/686U to your NVR with the previous version.
