Smarter Engineering Takes the Stage

The stage is set for JVC's new, multiple award winning KY-PZ510 CONNECTED CAM™ PTZ camera, with a **super-wide 80 degree field-of-view** that makes even the smallest stage appear larger than life, and **4K 60P streaming** capability for stunning imagery without jitter across thousands of miles. When combined with features like our new **SMART auto tracking system** that allows the camera to focus and follow your main subject, support for **NDI® 5**, and **SRT** (Secure Reliable Transport) streaming protocol, you have the foundation for the clearest, widest, most ubiquitous, stable, and secure imagery distribution in its class. The JVC CONNECTED CAM Professional PTZ camera line provides you with the best results possible by incorporating the latest technologies, making both integration and operation simple and smart. Each model is available with NDI/HX for integrating with the most popular streaming systems available today and all come standard with SRT video transport protocol which dynamically enhances streaming performance across unpredictable networks such as the public internet. Most importantly, JVC's **PTZ Peace Of Mind Customer Support** is there to help you each step of the way. Find your remote production solution at pro.jvc.com.
