

# Network Camera System

## VN-C30U High Resolution 1/4" CCD, MPEG1/JPEG compression

124

### New features in addition to VN-C3WU

- This versatile camera can be plugged into just about any network for high-speed data transfer and operation.
- Incorporating a high-resolution 1/4" CCD with 380,000 pixels, the VN-C30U captures superior, high-quality images with more light and more detail. Clear, bright images are assured, even at night, making it ideal for monitoring or security/surveillance applications where accurate imaging is critical.
- Powerful optical 15x zoom mechanism can easily controlled from your PC.
- To improve delivery of motion images, the VN-C30U adds MPEG1 image compression to the conventional JPEG standard. With MPEG1, motion images can be efficiently compressed for network transfer, while maintaining a frame rate of 30fps for minimal loss of movement. Managing data flow over your network is easy too, because you can also set the constant bit rate you prefer.
- With a built-in 10Base-T/100Base-TX interface, the VN-C30U can be incorporated with equal ease in a conventional 10Base-T LAN or the latest high-speed 100Base-TX network. Simply connect the camera to an existing Ethernet network and assign it an IP address. That is all you need to do to get it up and running on a network.
- High-speed pan/tilt function gives control over horizontal, vertical and diagonal camera movement. Up to 10 presets are available, allowing quick access to the desired monitor location.
- The VN-C30U can be set to work in conjunction with an infrared sensor or door alarm, automatically moving to a preset position when an alarm signal is received. Automatic alarm recording is also possible.
- The included viewer/controller software enables remote control of a variety of camera operations and settings such as network and picture quality setting, as well as pan/tilt and zoom control. You can also operate recording and playback of the camera images.

### Accessories

#### VN-BK30

Ceiling bracket for VN-C30U/C3WU

#### VN-BK31

Wall bracket for VN-C30U/C3WU
