D-ILA® Newly Developed D-ILA Device

The exceptional picture quality achieved by JVC projectors is a result of the precision technology behind the D-ILA device. The new 6th generation device, with a 40% narrower pixel gap, achieves a 10% improvement in light efficiency for a brighter image with higher contrast and incredibly rich detail.

a 40% narrower pixel gap from 0.5μ to 0.3μ achieves much brighter, higher contrast images

4K e-shift3 4K Precision JVC e-shift3 Technology

Optimized for the new D-ILA device, new 4K e-shift3 shifts sub-frames by 0.5 pixel both vertically and horizontally to achieve 4-times the pixel density of the original content—boosting definition to the highest level yet.

Multiple Pixel Control (Scaler/Processor for 4K e-shift3)

The newest derivation of Multiple Pixel Control is a high-performance image processor that enables precise reproduction of Full HD sources on this 4K projector. New, Auto Mode performs frame adaptive filtering and picture generation to achieve an HD image optimized for a variety of scenes thereby enabling an immersive 4K experience without complicated picture adjustments.

Notes about viewing 3D video content

• The optional 3D Synchro Emitter and 3D glasses are required to view 3D images from the D-ILA projectors. 3D video software (3D media or output of 3D broadcasts) and a 3D-compatible video player are also required. • Perception of 3D images will vary with individual viewers. • Stop viewing 3D images immediately if any discomfort such as headaches, dizziness, eye fatigue, etc. occurs. • Viewing of 3D images by children under the age of five is not recommended. • Read the Safety Precautions in the User Manual carefully before viewing any 3D source.

• The projector is equipped with a new super-high pressure mercury lamp, which may break, emitting a loud noise, when it is subjected to shock or after it has been used for some length of time. • Please note that, depending on how the projector is used, there can be considerable difference between individual lamps regarding how many hours they will operate before requiring replacement. • An additional payment is required for installation of a new lamp, if necessary. • The projector lamp requires periodic replacement and is not covered by warranty. • Please be aware that, because the D-ILA device is manufactured using highly advanced technologies, 0.01% or fewer of the pixels may be non-performing (always on or off).
